x Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2018.

Section 1 - Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Mallinckrodt plc's Conflict Minerals Report ("CMR") for the calendar year ended December 31, 2018 is filed, in accordance with Rule 13p-1 of the Securities and Exchange Act of 1934, as an Exhibit to this Specialized Disclosure Form ("Form SD") and is publicly available at *mallinckrodt.com/investors/sec-filings*. The content of any website referred to in this Form SD is included for general information only and is not incorporated by reference in this Form SD or the CMR.

Item 1.02 Exhibit

The CMR required by Item 1.01 is filed as Exhibit 1.01 to this Form SD.

Section 2 - Exhibits

Item 2.01 Exhibits

Exhibit 1.01 - Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form SD.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Title: Vice President, Corporate Secretary and General Counsel, International

Conflict Minerals Report

Introduction

Mallinckrodt plc is a global business consisting of multiple wholly owned subsidiaries (collectively, "Mallinckrodt" or "the Company") that develops, manufactures, markets and distributes specialty pharmaceutical products and therapies. The Company's Specialty Brands reportable segment's areas of focus include autoimmune and rare diseases in specialty areas like neurology, rheumatology, nephrology, pulmonology and ophthalmology; immunotherapy and neonatal respiratory critical care therapies; analgesics and gastrointestinal products. Its Specialty Generics reportable segment includes specialty generic drugs and active pharmaceutical ingredients.

This Conflict Minerals Report ("CMR") for the year ended December 31, 2018 ("the Reporting Period") is presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934 ("the Rule"). The Rule imposes certain reporting obligations on U.S. Securities and Exchange Commission ("SEC") issuers whose manufactured products contain certain minerals which are necessary to the functionality or production of their products. These minerals are cassiterite, columbite-tantalite (coltan), gold, wolframite, and their derivatives, which are limited to tin, tantalum and tungsten ("3TG(s)" or "Conflict Minerals"). The Rule focuses on 3TG emanating from the Democratic Republic of the Congo ("DRC") region and nine adjoining countries (together, the "Covered Countries"). If an issuer has reason to believe that any of the Conflict Minerals in their supply chain may have originated in the Covered Countries, or if they are unable to determine the country of origin of those Conflict Minerals, then the issuer must exercise due diligence on the Conflict Minerals' source and chain of custody and submit a CMR to the SEC that includes a description of those due diligence measures.

This CMR relates to the process undertaken for Mallinckrodt products that were manufactured, or contracted to be manufactured, during the Reporting Period and that contain Conflict Minerals. The Company's policy with respect to the sourcing of conflict minerals (the "Conflict Minerals Policy") can be found on its website at mallinckrodt.com/about/partnering/suppliers/conflict-minerals-policy.

Executive Summary

Mallinckrodt performed a Reasonable Country of Origin Inquiry ("RCOI") on suppliers believed to provide Mallinckrodt with materials or components containing 3TGs necessary to the manufacture of Mallinckrodt's products, which are limited to its non-drug products (i.e., medical devices). Mallinckrodt's suppliers identified 318 valid smelters and refineries ("smelters"), of which Mallinckrodt identified 47 as sourcing (or there was reason to believe they may be sourcing) from the Covered Countries. Mallinckrodt's due diligence review indicated that 38 of these smelters have been audited and are conformant to the Responsible Minerals Assurance Process ("RMAP"). The remaining 9 smelters were subject to Mallinckrodt's risk mitigation process according to the Organisation for Economic Co-operation and Development ("OECD") Due Diligence Guidance for Responsible Supply Chain of Minerals from Conflict-Affected and High-Risk Areas ("OECD Due Diligence Guidance").

Company Management Systems

Mallinckrodt's strong management systems were established according to Step 1 of the OECD Due Diligence Guidance. Mallinckrodt's management systems included:

- Step 1A Adopted, and clearly communicated to suppliers and the public, a company policy for the supply chain of minerals originating from conflict-affected and high-risk areas:
 - Implemented a Conflict Minerals policy;
 - Policy made publicly available at mallinckrodt.com/about/partnering/suppliers/conflict-minerals-policy; and
 - Policy communicated directly to suppliers as part of RCOI process.
- Step 1B Structured internal management to support supply chain due diligence.
 - Maintained an internal cross functional team to support supply chain due diligence;
 - Appointed a member of the senior staff with the necessary competence, knowledge, and experience to oversee supply chain due diligence; and

- Applied the resources necessary to support the operation and monitoring of these processes including internal resources and external consulting support.
- · Step 1C Established a system of transparency, information collection and control over the supply chain:
 - Implemented a process to collect required supplier and smelter RCOI and due diligence data. Full details on the supply chain data gathering are included in the RCOI and Due Diligence sections of this CMR.
- Step 1D Strengthened company engagement with suppliers:
 - · Directly engaged suppliers during RCOI process;
 - Reviewed supplier responses as part of RCOI process; and
 - Implemented a plan to improve the quantity and quality of supplier and smelter responses year over year.
- Step 1E Established a company and/or mine level grievance mechanism:
 - Recognized the RMAP's three audit protocols for 3TG as valid sources of smelter or mine level grievances; and
 - Utilized Mallinckrodt's ethics violations reporting system which allows employees to voice confidentially, without any fear of retribution, any concerns of potential violations of the Company's Conflict Minerals Policy.

Reasonable Country of Origin Inquiry (RCOI)

Mallinckrodt designed its RCOI process in accordance with Step 2A and 2B of the OECD Due Diligence Guidance. Mallinckrodt's RCOI process involved two stages:

- Stage 1 Supplier RCOI (Step 2A of the OECD Due Diligence Guidance)
- Stage 2 Smelter RCOI (Step 2B of the OECD Due Diligence Guidance)

Supplier RCOI

Mallinckrodt designed its supplier RCOI process to identify, to the best of its efforts, the smelters in Mallinckrodt's supply chain in accordance with Step 2A of the OECD Due Diligence Guidance. Mallinckrodt's supplier RCOI process for the Reporting Period included the following:

- Developing a list of suppliers providing 3TG containing components to Mallinckrodt;
- Contacting each supplier and requesting them to complete the industry standard Conflict Minerals Reporting Template ("CMRT")
 including smelter information;
- · Reviewing supplier responses for accuracy and completeness;
- Amalgamating supplier-provided smelters into a single unique list of smelters meeting the definition of a smelter under one of three
 industry recognized audit protocols; and
- Reviewing the final smelter list (and comparing it to industry peers) to determine if Mallinckrodt reasonably identified all of the smelters in its supply chain.

For the Reporting Period, Mallinckrodt's RCOI process was executed by Claigan Environmental Inc. ("Claigan").

Mallinckrodt's suppliers identified 318 smelters in their supply chain. The specific list of smelters is included in the Smelter and Refineries section at the end of this CMR.

Smelter RCOI

Due to the overlap between smelter RCOI and smelter due diligence, the smelter RCOI process is summarized in the Due Diligence section of this CMR.

Due Diligence

Mallinckrodt's "Due Diligence Process" was designed in accordance with the applicable sections of Steps 2, 3, and 4 of the OECD Due Diligence Guidance.

Mallinckrodt's smelter RCOI and Due Diligence Process were designed to:

- Identify the scope of the risk assessment of the mineral supply chain (OECD Step 2B);
- Assess whether the smelters/refiners have carried out all elements of due diligence for responsible supply chains of minerals from conflict-affected and high-risk areas (OECD Step 2C); and
- Where necessary, carry out, including through participation in industry-driven programs, joint spot checks at the mineral smelter's own facilities (OECD Step 2D).

Mallinckrodt's smelter RCOI and Due Diligence Process included the following:

- For each smelter identified in Mallinckrodt's supply chain:
 - Mallinckrodt attempted direct engagement with the smelter to determine whether or not the smelter sources from the Covered Countries; and
 - For smelters that declared directly (e.g., email correspondence, publicly available Conflict Minerals policy, or information available on their website) or through their relevant industry association that they did not source from the Covered Countries, but were not recognized as conflict-free by the RMAP, Mallinckrodt reviewed publicly available information to determine if there was any contrary evidence to the smelter's declaration. The sources reviewed included:
 - Public internet search of the facility in combination with each of the Covered Countries;
 - Review of specific non-governmental organization ("NGO") publications. NGO publications reviewed included:
 - Enough Project
 - Global Witness
 - · Southern Africa Resource Watch
 - Radio Okapi
 - The most recent United Nations Group of Experts report on the DRC.
- For smelters that did not respond to direct engagement, Mallinckrodt reviewed publicly available sources to determine if there was any reason to believe that the smelter may have sourced from the Covered Countries during the Reporting Period.
 - Mallinckrodt reviewed the same sources as those used to compare against smelter sourcing declarations.
- For high-risk smelters (smelters that are sourcing from, or there is reason to believe they may be sourcing from, the Covered Countries and are not currently conformant to the RMAP), Mallinckrodt communicates the risk to senior management (OECD Step 3A) and conducts risk mitigation on the smelter according to OECD Step 3B.

For the Reporting Period, Mallinckrodt's smelter RCOI and Due Diligence Process was executed by Claigan.

Mallinckrodt's suppliers identified 318 smelters. Mallinckrodt identified 47 smelters that source, or there is reason to believe they may source, from the Covered Countries.

Mallinckrodt determined that 38 of these 47 smelters have been audited and conformant to the RMAP. Mallinckrodt conducted risk mitigation on the remaining 9 smelters.

Risk Mitigation

Mallinckrodt conducted risk mitigation on 9 smelters that were not recognized as conformant to the RMAP. Mallinckrodt's risk mitigation was designed in accordance with Step 3B of the OECD Due Diligence Guidance and was reported to designated senior management in accordance with Step 3A of the OECD Due Diligence Guidance. Mallinckrodt's risk mitigation process included the following:

- Additional due diligence to determine if there was any reason to believe the smelter directly or indirectly finances or benefits armed groups in the Covered Countries;
- Verification with internal stakeholders and relevant suppliers of whether 3TGs from the specific smelter were actually in Mallinckrodt's supply chain during the Reporting Period; and
- · Direct engagement with each high-risk smelter to verify risk and to encourage the smelter to become conflict-free.

Risk mitigation was required for 9 smelters verified by suppliers likely to be in Mallinckrodt's supply chain. All 9 smelters came into Mallinckrodt's supply chain through 12 suppliers, involving a small number of parts. Mallinckrodt will evaluate opportunities to encourage the suppliers to remove these smelters from their supply chains, or to remove the suppliers.

Improvement Plan

Mallinckrodt is taking and intends to continue to take the following steps to improve the due diligence conducted to further mitigate risk that the necessary Conflict Minerals in Mallinckrodt's products could directly or indirectly benefit or finance armed groups in the Covered Countries:

- a. Incorporate a Conflict Minerals clause into new and renewing supplier contracts;
- b. Continue to drive Mallinckrodt suppliers to obtain current, accurate, and complete information about the smelters in their respective supply chains;
- c. Request smelters sourcing from the Covered Countries to be audited and certified to a protocol recognized by the RMAP; and
- d. Follow up in 2019 on smelters requiring risk mitigation.

Mallinckrodt has provided information as of the date of this report. Subsequent events, such as the inability or unwillingness of any suppliers or smelters to comply with Mallinckrodt's Conflict Minerals Policy, may affect the Company's future determinations under the Rule.

Website addresses are included in this CMR for reference only. Any information contained on Mallinckrodt's website is not incorporated by reference into this CMR.

Smelters and Refineries

Below are the smelters reported to Mallinckrodt as likely in the Company's supply chain during the Reporting Period.

Metal	Smelter
